#### What are our objectives?

1. To educate humanity on the spiritual dimension and how it affects our lives.
2. To provide tools for people to:
  - > Understand and experience the spiritual dimension.
  - > Understand and overcome problems where the cause is spiritual in nature.
  - > Achieve spiritual progress and everlasting happiness.

#### Key features

1. While the spiritual research is carried out in the hermitages (ashrams) in India over the past twenty years, SSRF was incorporated in Melbourne, Australia and USA primarily to publish information about the research findings for an international audience.
2. Spiritual science is a science that teaches basic universal spiritual principles that can be applied to all of humanity regardless of culture or religion.
3. These basic principles when put into practice helps accelerate our spiritual growth and protect us from negative elements in the spiritual realm.

#### Our target audience

All persons with a curious mind to explore the spiritual dimension and grow spiritually.

### About spiritual research?

In simple terms, spiritual research is researching the spiritual dimension or spiritual realm with the help of an advanced sixth sense (ESP). The spiritual realm is that which cannot be perceived through our five senses, mind and intellect. It includes the world of heaven, hell, angels, spirits, auras, ghosts etc. Therefore in spiritual research, the analysis behind root causes of events and phenomena are attributed to not only the physical and psychological but also the spiritual realm.

The source of knowledge on our website is the Universal Mind and Intellect, which is a synonym for God's Mind and Intellect. It is accessed through the medium of a highly advanced sixth sense. Through spiritual research we have found that up to 80% of causes of events and problems in life have their root cause in the spiritual realm.
